### Open Evenings

Tuesday 20<sup>th</sup> March 4 – 6pm

Thursday 22<sup>nd</sup> March 4 – 6pm

You should have all received your appointment date and time. All the teachers give up their time to speak with you about your child. Please arrive on time for your appointment. Thank you.

Thank you to Mrs Whaley and Mrs Fitzgerald for organising a fantastic week on other faiths. The children learnt a great deal on the differences between how people from around the world practice their beliefs.

### Health and Safety

Please make sure your child dismounts from their scooter/cycle at the school gate as there have been a few incidents where people have nearly been knocked off their balance. Thank you.

The chicks are back with us this week! We have an egg incubator in the school and the chicks are starting to hatch. Why not ask your child all about them?

**All clubs will run as normal next week, unless there is a problem with the weather.**

### NEXT WEEK

<b>Monday</b>	<b>Penitential Service – School Hall</b>
	<b>Mini Beast work shop</b>
<b>Tuesday</b>	<b>Open Evening for parents 4.00 – 6.00pm</b>
<b>Thursday</b>	<b>Open evening for parents 4.00 – 6.00pm</b>

Please note that all attendance awards are for the previous week.

### Fifth Sunday of Lent (Year B)

**Gospel:** John 12:20-33

Jesus uses the image of a grain of wheat to talk about what is in store for him – death and resurrection. He says that one single grain of wheat can produce a rich harvest. Let's think some more about this today. Jesus is describing how wheat grows. Has anyone seen a field of wheat? We use wheat to make bread. He is using this story to explain to us that when he dies, it won't be the end of everything. He will rise from the dead. This is what we celebrate at Easter.

What happens to a seed when you plant it? The seed disappears as it grows into a plant.

One single seed can grow lots of food. Think about how tiny an apple seed is inside your apple, yet you can plant it and grow it into an apple tree which will produce lots of other apples. Or the seed inside a tomato which will give you lots of tomatoes when it grows. Can you think of some other foods that can be grown from a single seed?

In a country called Zimbabwe in Africa, the Simatelele School has a vegetable garden. They started it with help from an organisation called CAFOD who help people who are very poor. CAFOD gives them seeds and tools and teaches them about how to eat a healthy diet.

The schoolchildren love the garden and all join in to help to grow the veggies: cabbage, spinach, tomatoes, carrots, sweet potato. Do you like any of those vegetables? What are your favourites?

The best thing is that now the children have more to eat, so their teacher, who is called Memory, says they are "full of life". They have more energy at school so they can study better and have more chances in the future. The seeds they have planted have grown into something very important.

Our actions, even if we do just one little thing, can also make a very big difference. What will you do this week to make a difference to someone who needs help?

**In the summer term, we will have our own edible garden to grow fresh vegetables. It is being built over the Easter holidays.**
